

AVM, L.P.

*Providing Investor Solutions Worldwide*

Norfolk Markets, LLC, ("Norfolk") and AVM, L.P. ("AVM") are independent institutional broker dealers based in New York and Boca Raton, FL. Norfolk and AVM have independently been providing investor solutions to world class financial institutions for over a decade and over a quarter of a century, respectively. Now, Norfolk and AVM are excited to have formed a strategic alliance whereby investors can access the experienced fixed income strategists and marketers of Norfolk in combination with the well-established idea generation and trading acumen of AVM. This strategic relationship gives Norfolk's institutional clients access to market-leading fixed income, credit and other investment solutions developed by AVM and Norfolk. Clients will be able to execute securities transactions directly with AVM to capitalize on AVM's robust infrastructure, market presence and execution capabilities. At the same time, for derivative solutions, clients will directly face their preferred dealer counterparties; AVM will execute derivative transactions on behalf of clients on a non-discretionary order basis through an introducing brokerage relationship as it has done since the inception of the derivatives markets. Whether it is in securities or derivatives, the driving force behind the Norfolk/AVM alliance is to leverage all of the firms' resources to provide thoughtful investment solutions to a select group of sophisticated clients.
